Comments: I support developing the Lemon Creek Mountain Bike Trail System option 2.

The trails will likely attract mountain bikers and others to the area who will spend money to diversify the economy of Prineville and make the community stronger and more resilient to market changes.

Option #2 will increase the percent of non-motorized trails from 32% to 42% in the Ochoco National Forest this will help to create greater balance in user groups. It will also follow the goals of multiple use for our national forest for the greater good of all citizens.

All options will promote healthy for exercise for locals, visitors and families.

I would like to encourage the USFS to adopt option #2 to provide a long term plan to promote and manage this net positive growth of mountain biking trails
