Comments: To whom this may concern,

I am sending this in support of the Lemon Gulch trail network in the Ochoco National Forest.

This would be a great addition for another recreational opportunity for Central Oregon residents including future generations and help with economic growth in the community of Prineville.

I feel this will also help alleviate pressure from the Lookout mountain trails and Deschutes NF trails becoming over-run as the population grows.

Also creating more trails for hikers and equestrian use will create a for those interested in participating in those activities will help increase less use of more popular areas.

Thank you for your consideration.

Sincerely,

Tim Henke
