Title:

Comments: This area needs to be left as is. We already have many developed areas available. More development leaves more scars upon the land. Mountain bike, hikers and horseback riders ect already can use the area. I'm so weary of the forest service claiming to make sure the public lands are well managed. You have failed miserable. Fires, developed areas that should have been left as they are.

We do not need more mountain bike trails, there are plenty. All this would do is bring more cars and vans (organizations bike tours) people and pollution to the area. Please think of the damage and impact this will have on the area, on the water shed, on the habitat for the animals already there. It's developed enough as is. There is plenty for people to enjoy as it is.

Quit adapting your policy's to accommodate the " latest and greatest" craze.

If you actually value the land, leave it as it is. It's accessible enough.
