Comments: I am HIGHLY objecting to this proposal. The amount of damage that will be done to the Ochocos by bicycles, let alone other vehicles pokeyramos@gmail.com humans killing the environment, will forever make a terrible footprint. Wildlife and livestock use this area, and keeping the forest natural is something that the actual forestry department should absolutely serve, to keep the natural habitat. I implore you to decline this proposal, preferably permanently, as it is not in the best interest of hunters, livestock, wildlife, etc . and only permanently injures the land.
