Comments: My concerns for this logging project are regarding land slides, road wash outs and water sources. My sister lives on a country backroad near jellico creek, like a lot of people do in this area, and someone clear cut a very small section of land that connects to that road. When it would come a heavy rain, because of the clear cut, sections of the road would wash out causing major ruts. Again, this was just a small section of land so I can just imagine what the damage would be like if this projected area is clear cut.
My sister and her family do not have access to city or county water so well water is their only source of water there. Even if the is a small chance that their water could be contaminated from the herbicides, this is not acceptable.

Thank you for your time.
