Comments: I would like to submit my objection to this project. Take a look at our landscape across this country and it is clear to see that preserving our natural landscape is not the main objective of the forestry service. Travel out west and look how the beautiful and natural landscape has been destroyed by the wind turbines, all in the name of free energy but at the expense of our beautiful country. Pick a highway and travel out west, it's all ruined.

Now you head back east and the forest are being raped by greed. I have looked for a couple hundred acres of wooded land for myself to enjoy and maintain in its natural state in southern Missouri and it is just unbelievable the acreage that has been destroyed due to deforestation or logging. It just breaks my heart to see the land destroyed like this. I have been looking in southern Kentucky and now see you want to clear those mountain tops. I object as an American citizen, 24 year military veteran and tax payer. I'm sure you have some speech about preserving the land through raping the land of its trees and I am fully aware you have the power to do whatever you choose but I am asking that you choose the less is more method. You are the forestry service and should be fighting with us not piling on to destroy more of our beautiful country. Please look at what is occurring around this country. The landscape is disappearing, please stop contributing to its demise.
