Title:

Comments: Sir, my name is Herb McClure, <redacted>. From a friend, I learned of the proposed "Crossover Project" to be implemented in Graham and Cherokee Counties. My late responds is to say: I am 100% in favor of the Forestry Service carrying out the "Crossover Project" .in all of its proposals.

I am an 82 year old outdoors-man, who has spent 66 years hunting, fishing, and enjoying the Chattahoochee National Forest in Georgia. I am familiar with the "Foothills Project" here in Georgia on the Chattahoochee National Forest, which is only a small drop-in a bucket, when comparison are made to the Crossover's incentives for wildlife and fisheries, which are my main interest. Especially, in the hardwood mountains above 2,000 elevation and along the valley trout streams. Never, in my fondest dreams, could I envision 16,000 acres being submitted in the Southeast. My hat is off to all personnel, involved in creating this proposal, and the future personnel's involvement when carrying this out.

Regards;

Herb McClure
