Comments: As a resident and small-time farmer outside of Prineville, I oppose the large Alternative 2 option. I am also a biker with children who ride, and I am not completely opposed to the development of trails in this area, but we should meet in the middle for those who use this land for grazing and for those who want to recreate. I moved here to have access to remote and peaceful forest land in locations like the majestic area of Mill Creek, it is a very quiet and beautiful place. This trail system will help the economy yes, but it will also bring a lot of traffic into the Mill Creek area. Scaling down the main proposal seems like the fair thing to do. I believe a compromise from both sides is the best option, I would like to see Alternative 3 or 4 implemented.
