Title:
Comments: (Lynnie is a 12 year old resident of Jellico Creek Church Rd. She was in attendance at the community meeting.)

1. I don't want you to do this because the animals could die from that poison.
2. The poison could kill our dogs cause they drink the water from the creek.
3. We like to play in the creek and the dogs get sticks and the water in their mouth and they will die from the poison.
4. We like seeing trees on our way to school like how the sunrise comes up from behind the mountains.
5. I don't want to die from playing in the creek or drinking well water.

(Lynnie made this list herself. It may seem extreme how there are so many comments on dying and I actually started to edit her comment but I chose not to. If this project happens, her generation will see all of it and she will be 52 at the end of the projected 40 years. These are legit concerns that she has as 12 year old girl, so her comment has not been edited.)
