Comments: Hello everyone, thank you for taking the time to read my input on the lemon gulch trail system.

For the past 5 years i have worked for a company based in bend that delivers in Prineville. What I have learned from the people there is they do not like change. Hence the need to highlight the overall Impact of the project, as I believe many locals have the wrong idea that the whole ochocos are getting over ran by trails. Lemon gulch would be a fantastic addition to the trails based out of Prineville and would create a new generation of talent.

When many people think of mountain bikers they assume the yuppieness, well I'm here to say that some of us, many of us in the Central Oregon area are not and work blue collar jobs. A great professional biker that demonstrates such qualities would be Kyle Strait.

Finally I think the way to motivate the town of Prineville to be more involved in the sport may take some grants to satisfy bike rentals thru the local shop or schools.
