Comments: I feel you need to do what's best for the people that live in the valleys of these mountains. Daniel Boone National Forest belong to the tax payers not big business. We live in the valleys that will be flooded when you remove all the trees that hold back the water and mud that will wash down. Look what happened this spring in eastern Ky. I feel that was a result of removing all the trees for strip mining. Take the trees reap the flow. Everything flows down stream. We need to save our beautiful mountains for future generations. We have species of flowers not found anywhere else. We have the endangered Black-sided Dace Minnow. We have the rare Mt Camellia, found only in a fifty mile around Knoxville, Tn. We have beautiful fall colors that attract tourists. We need the forest services to work for us, not big business. You chose forestry because you love it . We pray you will do the right thing.
