Comments: I firmly disagree with the approach proposed for this district of the Daniel Boone, National, Forest. Stewardships of these national forest, and these aged wood lots should be held in preservation instead of just quickly harvested. Other states in the national forest have seen these types of hard cuts and removals equal in invasive species encroachment on these precious areas of our state.

I think it would be more prudent to show through reasoning of the need to consume the forest as opposed to the preservation of these age wood lots. Not holding these forest in perpetuity is a detriment to all except the logging in communities. Just because some of these communities don't see the damage does not mean that it doesn't affect everybody in the commonwealth. I appreciate my opportunity to weigh in on this and hope that my opinion makes a difference in the decision making factors of these precious resources we hold dear. Thank you.
