Title:

Comments: Dear USFS, I am adamantly opposed to the Lemon Gulch trails. We as humans have encroached on our wildlife for too long and this is no exception. Our wildlife winter in this area and in my opinion it is critical that it is left as it is to ensure we have deer and elk and all other wildlife that use this area to survive the winter so we can enjoy seeing them while visiting this area. Please do not approve this trail, our animals are much more important than a bike/hike trail. Thank you, Brad Johnson concerned Crook County citizen.
