Comments: I support the Stibnite project and would like to see it move forward. The mine will provide significant value to the community and will provide critical natural resources for our American economy.

In reviewing the access and transportation plans, I support the project constructing the Burntlog access road. It is important to keep the roads away from the major tributaries, as well as avoiding the avalanche dangers of the area between Yellow Pine and Stibnite. The Burntlog route will be safer and will provide better access to the mine throughout operations.
