Comments: Please reconsider destroying our beautiful mountains/ trees. So much has already been destroyed with the new Hwy going from Williamsburg to Pine Knot. Wildlife has already had to find new homes and food sources. We have one of the most beautiful area of Ky with our mountaintops, so why would you want to destroy that? So many will be affected by this with mudslides, not to mention the road destruction from the heavy equipment when you come take the trees out for monetary purposes. Please leave it alone and let our grandkids, great grandkids etc enjoy the beauty and healthy fresh air we get from the trees. Thank you
