Comments: You have got to be kidding if you think that spouting some nonsense reason that is completely opposite of any past or modern ecological science we have will be enough to keep the public from knowing that some wealthy shareholder wants you to open this place up for logging for their profit. They can't possibly be paying you enough to sell out your own specie's future so some fat cat can line their pockets temporarily from wood from one of our last old growth forests while we are facing ecological collapse on a global scale... Shame on you. You are not fit to steward the land.
