Title:

Comments: Our concern is that there is an unestablished boundary line between our property and US Forest Service property. Per past conversation between Eddie Baird, Laurie Smith, and Rick Wilson (forest service employee) regarding the boundary line, Laurie confirmed that this particular boundary line remains unestablished. Our primary concern is that is the forest management project is performed in close proximity to this property, that boundary lines would first be established. Prior owners to the land were West Coal Company, from whom we purchased the warranted deed.
