Title:
Comments: I have lived in Eastern KY all my life, please stop exploiting us and our forest. We are one of only 2 green belts in the United States, people are moving here because they realize how important our environment will be in the future. Our local governments take chemicals from big companies because of their own self-interest to be rich and are killing us all by polluting. We need clean water and forests, please keep that in mind when you make decisions about Eastern KY. Our future should not be sacrificed for short-term financial gain that won't help EKY.
