Comments: I am vehemently opposed to the Jellico Project. We know forests act as air filters, as air coolers <https://www.theguardian.com/environment/2008/oct/31/forests-climatechange> and as chemical aids to body, mind and soul. . <https://www.hsph.harvard.edu/news/hsph-in-the-news/the-health-benefits-of-trees/>

You've heard of NIMBY? Well, this is backyard to all of us living on this planet.

For those living in the area, the risk of landslides, pollution of local waterways causing harm and death to local fauna and flora are immediate and severe. We saw what happened in eastern KY just this year, largely as a result of deforestation for coal extraction.

This project is an unconscionable project. No no and no to this.
