Comments: I would like to ask that the utmost consideration and research be applied to this project. The impact could be detrimental for decades. Massive flooding is occurring on a more frequent basis in Eastern Kentucky and profit should not control the outcome. Profit should never supersede safety and sadly this is happening in the USA more and more frequently. I can only hope some of you have grown up and spent enough time in the woods to see if this endeavor is detrimental to the forests of Kentucky. Knowingly following through with an irresponsible action only to make money is a mindset that we have to change.
