Comments: The Daniel Boone Forest is what I am most proud about Kentucky. This project breaks my heart. Our state has suffered recent destruction from clear cutting and heavy flooding. I do think there is a role for the US Forest Service: repairing mud slides from previous clear cutting, removing invasive plants, treating diseased trees, protecting water sources, protecting habitat, projecting impact of climate change, preserving the natural splendor of the forest to provide peace, tranquility and healing. Please live the USFS Mission of caring for the land and serving people. Thank you for the opportunity to share my thoughts.
