Title:

Comments: I am 100% against the clear cutting of the Daniel Boone national forest pacifically this project. There is absolutely no need for clearcutting. It will only destroy God's beautiful land! Clearcutting will cause landslides let alone, the pesticides that will be used will poison our animals are fish and anything else living in the creek. This will also destroy our organic gardening, and damage our grazing land. Every day, we see blue herrings enjoying the creek, hawks and an occasional bald eagle fly over the valley. We also see foxes, coyotes and bear. Our sheep, horses and chickens are grazed as well. Clear cutting will create nothing but mud and wash away all nutrients from our soil.
