Title:
Comments: It's Imperative/Crucial To Leave ALL Old Growth and Mature Trees over 100 Years Old and/or Greater 20 inches DBH within 300 feet of forest logging roads "ON SITE" after felling for wildlife, carbon sequestration, water retention, erosion control, and future wild fire impediment.

Many miles of roads need to be permanently closed. In addition, roads into roadless areas which end with no trailheads or official facilities, also need to be permanently closed.

Thank you for your time and consideration.
