Title:

Comments: Hello,

I would like to encourage you to approve the lans swap to improve public access. I have found myself in love with the Crazies, and hear them call to me. I admit that I found myself frustrated with the current ownership situation, when I wanted to get to particular location but was blocked because of the combination of geology and private boundaries. It would be nice to no longer have such a worry.

I admit that I do not get into the Crazies nearly as much as I would like, I do look forward to exploring without worry of inadvertently trespassing on private property.

Thank you for taking the time to read this.

Lance Loving
