Title:

Comments: I believe that we should all have access to forest service land. We can all co-exist and respect each other. The bike community is a wonderful, supportive community. If a human wants to go out and use there own two legs to enjoy the outdoors, we should have the right to do so. It should be encouraged to get out and enjoy the outdoors, not discouraged. These trails give us access to better downhill terrain that is hard to find elsewhere in central oregon.

The people who organize the trail systems in the ochoco's are very reasonable and kind. They have made every effort to work with the ranchers and the community. I would love to see the community work together to form a trail system that we can all have access to.
