Comments: The Crazy Mountains are a special and unique place that is important to me. I appreciate your efforts to address the public and private checkerboarding.

The biggest restriction for me spending more time there is lack of access to the public lands. Most memorable trips have been to Cave lake which required getting "permission" from the land owner to cross his property, no problems. I request that you include in the land exchange conservative easements are put on public lands going into private ownership. The Sweetgrass drainage is special and should be protected for all to have a chance to access so public and administrative access claims to sections 7, 8 and 10 in Sweetgrass drainage should be retained

Without easements in place, there is no guarantee that existing low-elevation wildlife habitat will stay intact.

Consolidation could end up harming wildlife by opening the door to private development within the existing Forest boundary. Please include easements as a condition of the exchange, as you did for the South Crazy Mountains Land Exchange.
