Comments: I have recently moved to Idaho, to the Treasure Valley area and have fallen in love with it's beauty, only to find out that this gold mine is supposed to go in.

Although this area has been impacted by historical mining, we do not need a new mine back in this area as it's taken this long to even get close to recovering. I oppose allowing the Stibnite Gold Project to proceed as proposed because it will once again cause damage to the very delicate and unique eco-system that is the Gem of Idaho. Gem meaning the Beauty not the minerals in the ground. Coming back here will not only cause irreversible harm to water quality and wildlife, but also public health, and a sustainable outdoor recreation-based economy not to mention polluting the area from Yellow Pine to Payette lake and beyond for generations to come. This project just needs to be stopped.
