Comments: We have been enjoying the Montana Mountains for many years and believe these to be some of the most beautiful regions in the US. Given Montana's remoteness public access is always challenging and the proposed land swap is a major improvement for the Big Sky area. Having hiked and experienced the beauty of the Crazy Mountains we are convinced that this expansion is an important public service that we strongly support. Both residents and tourists will benefit from this transaction for generations to come.

Thank you!
