Comments: I'm opposed to this land swap and frankly expect more from our USFS to ensure that these public lands remain in good hands for the people to access. This deal gives far too much control and benefit to the private landowners, the larger being the Yellowstone Club which has nefarious intent and is run by out of state interests. Don't screw this up, folks-the Crazies are special and we've lost enough access to this beautiful state from deals like this. Funneling everyone through one access point is a recipe for disaster, and trusting these private stakeholders who abhor public interests and land users is not going to work to the people's benefit. I suspect you know this already so please do your jobs as representatives of the people here. We need more access to the Crazies, not less. And I don't trust any of these corporate clowns and land barons trying to keep us out for their own profit. Opposed Montanan here, and I genuinely love spending time in our Crazies-don't screw this up.
