Comments: Hi,

I'm OPPOSED to the crazies swap. If it's a net loss of wetlands, the govt and US people get the short stick on mineral rights (and thereby give up a ton of control), and it'll mean a net loss of access for hunting, Fishing, and hiking.

Thanks for your consideration. You are right to try and consolidate land... but this is a bum deal. We can do better. Don't let the Yellowstone club's big money get the best of the US taxpayer.
