Title:

Comments: I Roman Schmid oppose this land swap for multiple reasons.

1. The yc has historicly degraded and poluted its lands and waters as seen by multiple lawsuites involving waste water polluting the gallatin river. Giving the public a net loss of wetlands in this trade is a not a good plan for the public enjoyment and use of the lands or for the resourse its self.
2. Loosing trail access in the crazies for public access is a huge detriment to the publics ability to use this range and land for not just hunters but also the native tribes ans tourism.
3. This deal does not offer any alternitives other than do nothing or go along with cross harbors big corperate plan.

It is impossible for me to see any bennifit to the public through this trade. It seems to be a Montana doesnt need to be made into another texas or collorado we like our public lands to remain in public hands.
