Title:

Comments: I Roman Schmid oppose this land swap for multiple reasons.

1. The yc has historically degraded and polluted its lands and waters as seen by multiple lawsuits involving waste water polluting the Gallatin River. Giving the public a net loss of wetlands in this trade is not a good plan for the public enjoyment and use of the lands or for the resource itself.
2. Losing trail access in the crazies for public access is a huge detriment to the public's ability to use this range and land for not just hunters but also the native tribes and tourism.
3. This deal does not offer any alternatives other than do nothing or go along with cross-harbor's big corporate plan.

It is impossible for me to see any benefit to the public through this trade. It seems to be a Montana doesn't need to be made into another Texas or Colorado we like our public lands to remain in public hands.
