Comments: I am writing to oppose the East Crazy Inspiration Divide land trade. I do not think the Forest service should trade land with the Yellowstone club. This trade will take public lowlands that many people enjoy and trade it for high alpine land that is not as desirable. This trade would not be beneficial for wildlife or public recreationists and would only benefit a select group of elites. As a whitewater paddler I hope to one day access crazy creek and will not be able to do so if the trade goes through.
