Comments: I strongly oppose the the East Crazy Mountain land swap as it is very unbalanced in favor of private landowners. The public will lose lots of high quality wildlife habitat for unproductive hard to reach habitat. Lots of public fishing streams will be lost. The public will lose two important and historic trails for one. The public loses lots of mineral rights and water rights while gaining few. High quality hunting and fishing habitat will be lost to the public. There is no disclosure of the economic value of the mineral rights, land and timber value lost to the public. That should be a requirement for any land swap! It should be illegal not to include it and will open this swap up to lawsuits if passed. Lawsuits I will gladly contribute to. Please do the right thing and turn down this very flawed exchange proposal. Thanks, Paul Rubright
