Comments: This proposed trade of public lands for private lands is a bad deal and I adamantly oppose it. If this unbalanced trade takes effect, it will result in a net LOSS for the public land owner. We have entrusted the USFS to manage OUR public lands with OUR tax dollars, yet as a public land owner, I will suffer a net LOSS of hunting and angling opportunities, a net LOSS of road and trail access, and a net LOSS of access to low-lying habitats and over 40 acres of wetlands (Executive Order 12962?). This proposal is NOT what the USFS should be doing as a surrogate for the public interests.
