Comments: I strongly oppose this land swap proposal as it is very unbalanced in favor of private landowners at the expense of public access. Under this proposal the public gives up productive land and miles of stream access for unproductive alpine acreage that is of minimal benefit to hunters, anglers and outdoor recreationalists.

We lose more water rights than we gain. We lose mineral rights. We lose access to two historic trails. We lose a significant amount of wetlands.

How anyone could think this would be beneficial for the public is beyond me.
