Comments: I oppose the East Crazy Inspiration Divide Land Exchange (#63115). This exchange as written neglects and minimizes the public's right to access, enjoy, and protect critical wildlife and fisheries habitats. Trading away lower, richer ecosystem zones in the Crazy Mountain complex to private interests for less diverse, less accessible, higher-elevation zones to the public would be a ripoff to the public and would subvert the USFS' obligation to serve the public and public trust doctrine.
