Comments: As an avid recreationist and an already finite amount of access into the Crazy Mountains, this land swap would even further impact mine, and many others, access into this beautiful area. The sweetgrass drainage holds a special place in my heart and I strongly oppose this land swap. The proposed land swap would give up public access to elk habitat for shaley high elevation land. The proposed trail for access to sweetgrass creek is much longer and would make recreation there extremely difficult. As a whitewater kayaker it makes it effectively impossible to enjoy the beautiful creek with amazing whitewater.
