Title:

Comments: thanks for taking our comments. I am support of the exchange IF you can incorporate these elements:

1. Conservation easements on all public lands that are exchanged, similar to what was proposed in the South Crazy Mountains Exchange.
2. A provision that gives the public or a land trust a first right-of-refusal should any of those lands come up for sale. This should also apply to the significant amount of inholdings in the core of the range that are not addressed in this proposal but are owned by several landowners who are involved in this exchange.
3. Assurance that this proposal will not affect the ongoing lawsuit over access to Sweetgrass Creek.

Please continue to work on completing this exchange but note my requested additional elements.

thanks
