Comments: We live close to the Crazies, and we want the public access to remain as it is. If it works, don't change it! That is my theory. Your swap would ruin access for the public to the top part of the Sweetgrass River. We should not be closing public access by giving it to private interests. Speaking as a person who has used this public access for over 60 years, I feel that it is beautiful country that should be shared by all, not closed by outside or inside private interest, who are looking for full control of that country for their clients from out of state mostly.

Please support the public interest by protecting our access in the Crazies. Do Not change it and take away our use of those beautiful lands and the Sweetgrass river. Don't do the swap!
