Comments: As someone who loves the beautiful lands in Montana and is a property owner, I am writing in support of the land swap that has come from years of effort and negotiation from many interested parties. I am happy that important lands will be traded to the United States. It provides better access to the public for some beautiful terrain while adding contiguous areas to provide additional recreation areas for people to enjoy (while prohibiting residential development). This seems like a great win/win and heartily support its approval.

Sincerely,

Robert Small
