Title:

Comments: As a public land user I do not believe this proposal is appropriate or fair to the public interests. The proposed land swap would eliminate access to productive land currently used for recreation that would not be replaced or addressed in anyway. The current proposal would provide the private land owners with many more miles of usable stream and productive hunting grounds. The proposal would provide only high elevation, low productivity land to the public users reducing the access to many recreating activities.

Appropriate Access should be maintained to the current public lands.

A land swap this unfair should not even be considered.

I oppose East Crazy Inspiration Divide Land Exchange #63115
