Comments: As stewards of the Forest please consider all of the pleas from local experts and residents that surround and recreate in the Payette National Forest and PLEASE do not allow this mine in such a beautiful area that is so essential for the fish, wildlife, recreationists and anyone who happens to be downstream of this. Please do the right thing and realize what this impact will cause for future generations. Please take a step back and look around, pause and re-think what the impact of your decision will make for years to come for future generations.
Thank you
