Comments: I strongly oppose the proposed East Crazy Inspiration Divide Land Exchange #63115. The proposal allows USFS to sidestep culpability for long term failure to meet its mandate related to prescriptive easements. Further, the proposal is an economic boon for private land owners. I would like to see an appraisal for the value of proposed exchange parcels. I would also like USFS to substantiate this quote from the preliminary environment assessment for the proposal, ""The Sweet Grass Trail is a long out and back trail with no scenic destination."
