Title:

Comments: Hello,

I'm writing in support of the Lemon Gulch Trail project. As an outdoors person who is concerned about wildlife and the environment, I appreciate that this project has undergone such extensive review of these concerns. As a nurse who is passionate about public health, I support creating accessible ways that facilitate physical activity for everyone, which this project does. As a proud American who has travelled to places without such extensive public lands, I am indescribably grateful for the public lands that have been placed in trust for us, the public. I hope to one day be one of the mountain bikers bringing my tourism dollars to Prineville as I ride the Lemon Gulch trails!

Thank you,

Trena Redman
