Comments: My family and I are strongly opposed to the proposed lemon gulch trail system for many reasons including not wanting an increase in traffic. We live near the turnoff for the trail system and an increase in traffic would alter our ability to feel safe with our kids catching the bus or playing outside. Another strong reason we oppose the trail system is the lemon gulch area will be flooded with people therefor destroying the wildlife activity in the area. Wildlife in our area should be considered first and foremost to preserve their natural habitat and normal activity before a recreational trail. There are many, many other recreational trails for bikers to use, we do not need to destroy a beautiful habitat to allow for another alternative for them. These are only a few strong points of our opposition to these trails and strongly urge for these trails to be refused to tarnish our small town and beautiful forests.
