First name: Drew

Last name: Redman

Organization: University of Washington Medical Center

Title:

Comments: As an avid mountain biker and hiker, I travel throughout the Northwest looking for adventure. Well-maintained trails and scenery draw my dollars to small cities like Prineville. Lemon Gulch provides a unique opportunity to expand the trail system for more people to love and feel connected to Prineville. I have shared trails with lumbermen, hunters, horses, and cattle in Washington, Montana, and North Dakota without incident, and believe we can all benefit from the Forest Service mission of multiple uses. Experiencing those different uses has expanded my knowledge and appreciation of all user groups. Please move forward with Alternative 2 and fulfill the Ochoco's potential.
