Comments: Firstly - Thanks for working in the Forest service. As more and more people begin spending time out in our Forests the need for management is more and more important.

I fully support the mountain biking trail system Lemon Gulch Trail System #58831. I'm 66 years old and was born and raised in Oregon so I've seen a lot of changes. One thing that I've learned is certain is that CHANGE will continue and it's up to everyone to try to insure the changes are for the good.

More and more people are spending more and more time out in our forests doing a variety of activities (motor sports, horseback riding, hiking, biking, skiing, camping, fishing, etc....). Sometimes these activities interfere when they overlap. Bicycle's & Motorcycle's can scare horses & hikers to mention an example. So It's beneficial to have places within a forest where conflicts can be minimized.

So please allow this mountain biking area to stay & progress as human demands increase in our national forests.

Thanks,

Doug
