Comments: A non-motorized, sustainably constructed trail system is an appropriate use of Ochoco NF Lands as proposed by the Lemon Gulch Trail System. I lived in Prineville, Oregon for 2 years and thoroughly enjoyed the area. However, the lack of non-motorized trails in the area is very limiting the the live-ability of the area. The Crook County, Grant County and surrounding areas will benefit greatly from the proposed trail system.

Recreation and tourism,

including recreational opportunities on National Forest System lands, contribute significantly to the economy and culture of Crook County and Prineville.
