Title:

Comments: I disagree with the Stibnite Gold Project EIS #50516. Diverting the river, adding new roads with the promise of repairing this at the end of the project is exactly what was wrong with the site.

These companies do not hold up to their promises. They leave destruction and waste behind for generations. To harm the area further in not in the best interest of Idaho's citizens. I value fishing and wildlife for our current and future population. I value access to public lands. This project should be rejected.
